Effect of synergy

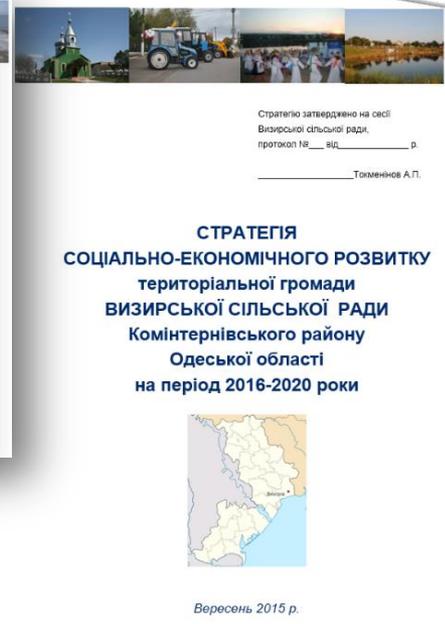

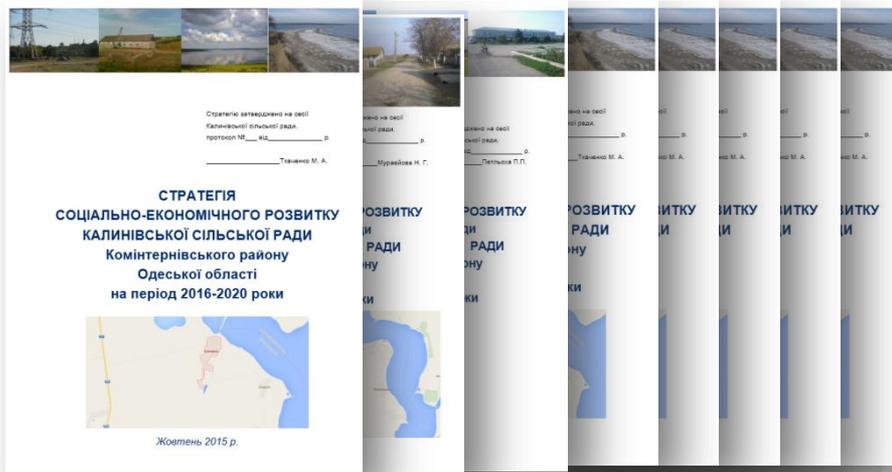

Strategizing of social and economic development of local communities:

It is elaborated the methodical basis for strategizing of social and economical development of local communities that was implemented into the practice of communities of Odessa region. The scientists of our Institute provide scientific and consultative support of the elaboration and implementation strategies. On the basis of the Odessa Regional University of State Administration it was set up an educational course for representatives of local authorities about different aspects of strategizing

Eastern Partnership Territorial Cooperation Programme Moldova-Ukraine – EaPTC

Project “Development of the Ukrainian-Moldavian cross-border production-scientific-educational cluster for processing of winemaking by-products”

Educational activities:

- study visits to Odessa, Ukraine and to Komrat, Moldova;
- educational seminars about different aspects of processing of winemaking by-products;
- educational brochure was published;
- study courses were elaborated about technological and economical aspects of the cluster functioning.

To the educational activities were involved students, professors, scientists, representatives of business sector and public authorities.

**On the basis of the Institute
educational platform for students of
the Odessa National Economic
University is created**

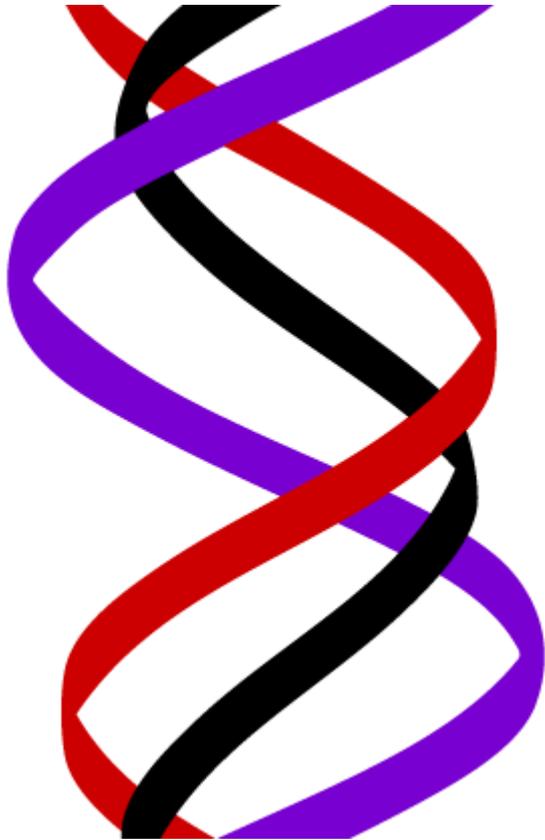

We provide the following activities:

- preparation of diploma works that solves concrete practical problems of regional development;
 - scientific articles publications;
 - participation in monographs;
 - participation in scientific conferences;
- students involvement into grant projects execution

Triple Helix Approach

approach is one in which the potential for innovation and economic development is enhanced by close, mutual interaction between government, research bodies, and industry. For example, in 2009 the European Commission established the European Institute for Innovation and Technology (EIT) to connect and stimulate cooperation between top-level research and development of academic and industrial research institutions

Main Directions of ReedBASE Cluster Activities

Clearing-House Role

- The central role of the ReedBASE cluster would be to act as clearing house, facilitating contacts and information sharing among its members. It would identify opportunities to strengthen its membership base, and to promote good practice for reedbed management throughout Europe
- creating eligibility for relevant project grants e.g. EU Transnational Danube Programme, EU Horizon 2020, EU Neighbourhood Programme, EIT and other national and bilateral schemes
- Forming consortia of members to bid for grants for research and development projects
- Joining the Triple Helix Association (<https://www.triplehelixassociation.org/about-tha>)
- Seeking collaboration with the European Institute of Innovation and Technology and relevant Knowledge and Innovation Communities.
